

With TRIBOMAR products at your side you will assess the expertise to help yourself determine and check the operational conditions of your machinery and equipment. The reliable oil test case contains the test devices enabling engineers to test the most important oil parameters. This means a reliable indi-

cation about the performance of the engine oil at any time without professional lab. Improved features in testing and handling are providing to the onboard engineer an easy-to-use test equipment with repeatable accuracy.

Oil Test Case N°3

Test Kit to determine main parameters of your lube oil

- Water-in-Oil Test for lubricants and fuels
- Base Number Test – values the alkalinity reserve of engine oils
- Viscosity Test – comparison of fresh and used oil

Consumables:

#1058/#1060, #1059, #1027

All consumables are non-dangerous goods for transport and storage.

Oil Test Case N°5

Test Kit to determine main parameters of your lube oil

- Water-in-Oil Test for lubricants and fuels
- Base Number Test – values the alkalinity reserve of engine oils
- Viscosity Test – comparison of fresh and used oil
- Spot Test – insolubles and impurities
- Salt Test – nature of water contamination

Consumables:

#1058/#1060, #1059, #1027,
#1066/#1061, #1047
