

TriboAmix

Fuel Compatibility & Stability Test

- Testing the compatibility of different fuels
- Testing the stability of fuels
- Oven to dry spot test paper
- Fully conform to ASTM D4740-19
- Temperature range from ambient to 105 °C
- Robust metal housing

The TriboAmix device is designed to determine the compatibility and stability of different and single fuels. The latest technology provides an easy-to-use measuring device to the field engineer. It is feature-rich, comes in a robust metal housing and is easy to handle. Reliable and repeatable accuracy makes the unit the ideal tool for controlling the condition of the operational fluids on site.

Order No.: 1090

Consumables:
#1027, #1048, #1348

For cleaning we recommend using
#1027 ReaMar Cleaning Agent

Compatibility

All blended fuels carry the risk of incompatible components causing them to become unstable with serious consequences for the users. Our compatibility test provides assurance against such occurrence.

Danger and risk

- Clogging of filters, pumps and injection nozzles
- Power loss/failure of the drive system – interruption in service
- High cost of removing blockages in pipes/cleaning tanks etc

Reason

- Fuel combines crude oil from many different sources that are not all compatible to others

Solution

- The TriboAmix enables the operator to assess the compatibility of different fuels in situ
