

OIL TEST KIT N°5 MK III

Test Kit to check main parameters of your lube oil

- Water-in-Oil Test (also suitable for all kind of fuels)
- Base Number Test - alkalinity reserve of engine oils
- Viscosity Test – comparison of fresh and used oil
- Spot Test - insolubles and impurities
- Salt Test - nature of water contamination

The oil test kit N°5 provides most sufficient tools to determine the quality of your lubricants onsite. No matter if engine oil or else, you get an instant indication.

With TRIBOMAR products at your side you get the expertise to help yourself controlling the operational conditions of your machinery equipment.

The new developed oil test case contains the test devices which enables engineers to test the most important parameters. This means a reliable indication about the performance of the engine oil at any time without a professional lab aside. Improved features on testing and handling are providing to the field engineer an easy to use test equipment with repeatable accuracy.

Order No.: 1607

Consumables:

- #1758
Organic WR Reagent 500ml (40 tests)
- #1059
BN Reagent 500ml (40 tests)
- #1727
Organic Cleaning Agent 500ml
- #1047
Spot Test Paper A5 (300 tests)
- #1061
Saltesmo (30 tests)
- #1066
Salt Reagent 250ml

TriboCon Mk III
Digital Water & BN Test

- **NEW:** 40% savings through less reagent needed
 - **NEW:** Multi-reagent usage
 - **NEW:** 80% time saving due to acceleration sensor
 - **NEW:** Intuitive menu with high contrast display
 - **NEW:** Data transmission to PC
 - **NEW:** Fully compatible with existing Tribomar reagents
 - **NEW:** Reduced test time: 90 sec.
- TBN / BN- Range: 4 – 150
 - Water-in-Oil Range: 0 – 10%
 - Rechargeable Batteries

We improved the existing traditional testing method through our new test device TriboCon Mk III: Faster and even more cost saving. Crew needs 80% less testing time and 40% less reagent due to its new design.

Measuring the water content of lubricants and fuels as well as to determine the Base Number [BN] in engine oils at a new ease.

Made of high-quality parts and enclosed in a robust coated metal housing. The ideal tool for field engineers controlling the condition of the operational fluids onboard.

Consumables:

Water Reagent: #1758	40 tests
BN Reagent: #1059	40 tests
Organic Cleaner: #1727	>100 uses

*40% savings on reagent
80% less process time*

*Inside of all
Oil Test Kits*

TriboCon MK III Digital Water & BN Test

What is the difference?

Our newest invention combines traditional testing with latest technique: Not rated by test time, but users intensity of acceleration the device!

The process bar shows the remaining test time: max 2 Minutes and 40% less reagent is needed. 40% Less waste, 80% less time and cost saving reagents.

New data management gives an optional manual calibration as well as using existing references. And to transfer easily up to 100 stored data.

Reliable as the previous, enclosed in a robust coated metal housing. Useable also with other makers reagents.

USB Battery Charger & Data Transfer

**Clear Display with Time,
Energy Status & Test Procedure**

Robust for Field Engineering

**Easy Recognition:
