

## Oil Test Cabinet N°5 Fuel and Lubricant Test Cabinet

This cabinet contains devices for

- Compatibility & Stability
- Water Content
- Base Number (TBN)
- FE / Iron Content

Plus Kits for

- Viscosity Quick Check
- Spot Test
- Salt Test

- Fuel Compatibility and Stability Test
- Water-in-Oil Test for fuels and lubricants
- Base Number Test – alkalinity reserve in engine oils
- Viscosity Test – comparison of fresh and used oil
- TriboIron 2.0 for corrosive and abrasive iron content
- Spot Test – insoluble and impurities
- Salt Test – nature of water contamination

The TRIBOMAR Oil Test Cabinet N°5 combines as a tailor made solution most necessary test equipment for testing the main parameters of fuel and lubricants for insular solutions as power plants or marine vessels. This enables the operators and engineers to control on site the condition of the technical fluids in operation at any time.

It is always useful to have a tool handy to determine the condition independently from the lab. TRIBOMAR provides to the field engineers easy-to-use measuring devices with reliable and repeatable accuracy.

**Customised versions of the cabinet can be assembled according to your requirements.**

**Order No.: 1836**
