

TriboIron 2.0 Test Kit Digital Iron Detection

- Corrosive & abrasive Iron Detection
- Measuring range 20 – 550 ppm
- Corrosive iron 20 – 550 ppm
- Abrasive iron 20 – 550 ppm
- Accuracy +/- 10%
- Test Kit includes 60 tests
- Non-dangerous consumables!

Engine manufacturers have changed their engine design to comply with Tier II NOx regulations and the latest Energy Efficiency Design Index (EEDI) guidelines. As a result, cold corrosion in these engines is more likely to occur due to liner operation temperatures below the acid dew point.

Older engines are nowadays forced to run on slow steaming mode to reduce fuel consumption. These engines now suffer similar problems with cold corrosion due to operation at lower temperatures.

The new generation of TriboIron 2.0 Test Kit:

- Easy to use!
- Automatic shaker available
- 1 Pill
- Automatic pipette

Order No.: 1505

Consumables:

#1518 (60 tests)

#1519 (120 tests)
